## Partners - our crowdfunding model

- Contribute with fixed amount to the CDT
- Co-create projects with academics
- Co-supervise students

When? 5 intakes 2019 – 20 – 21 – 22 – 23 – 24

How many? 23 partners & 84 studentships

## Partners - our crowdfunding model

We are financially stable:

- We do not really need more partners

**BUT**

- We need partners to fulfill their commitment (!)

## Partners - our crowdfunding model

### Letter sent to partners (November)

- We have your letter of support for the application
- We need signature of partners letter to confirm commitment
- You can set terms how you pay us !

## Partners - our crowdfunding model

In the first intake of new students, PhDs have been established with 10 of our 17 industrial partners. Partners are not limited to a single student but over the life of the CDT may engage with multiple studentships or may decide to link to academics to formulate projects early or late in the CDT funding cycle.

We now need to look to collect the CDT membership subscriptions. In discussing this with you as the CDT was drafted, we mentioned this could be flexible and this is the case. However, our finance office will need various details from you in order to set up the invoicing. I would therefore be very grateful if you could complete the table on the following page.

## Partners - IP

Following the recruitment of a student the IP for a project will be agreed between the University, Company and Student.

This will be in the format of a standard studentship agreement.

The university that the project belongs to will be responsible for creation of the studentship agreement.
